

## Features:

Gem Series Down light is a high-end diffuse lighting: which body adopt the die casting aluminum, spraying high diffuse reflectance, high thermal conductivity and radiating materials in the light surface, adopt five surface emitting Nichia chips from Japan, diffuse light, and can't see the led chips, just like lighting by the medallions, the soft light will not harm the eyes. the design of the light is beautiful, simple and Luxurious, good heat dissipation design minimized lumens depreciation, external LED power supply.

- Extremely short response time, light up instantaneously, no flickering or glare, no stray light, can be turned on and off frequently and be adapted to various lighting.
- No fluorescent flicking, no contamination of Hg or Li.
- LED Size: Nichia miniwatt LED
- Working Temperature: -20~50°C
- Life span is longer than 50,000 hours
- Ip20, non-waterproof.
